Databases:	MySQL, PostgreSQL
Soft Skills:	Problem-solving, Team collaboration, Adaptability, Time-management, Communication
IT & System Skills:	Hardware assembly and maintenance, peripheral device setup, driver installation, software installations, system troubleshooting

WORK EXPERIENCE

Full Stack Web Developer Meijun LLC, San Diego, California (Remote)	December 2023 - July 2026
Terra Education (Portal & CMS): - Developed and maintained both front-end and back-end web applications using React.js, and Node.js and PostgreSQL (PERN stack). - Contributed to the development of Terra Education web systems, supporting dynamic content and user interaction with Typeform API integration for dynamic form submissions. - Implemented AWS including Lambda for serverless functions, enabling automated workflows and efficient backend processing. - Integrated Datadog for comprehensive monitoring including API integration with Jira for automated issue tracking, and Session Replay implementation to capture user interactions, improving system observability, incident response, and debugging capabilities. - Gained hands-on experience working with Salesforce to support client data management and system integrations. - Managed and corrected client-provided spreadsheet data, addressing issues related to customer records, payment statuses, and Salesforce data alignment. - Managed database operations with PostgreSQL, including schema design and query optimization. - Integrated third-party services including Typeform for dynamic form submissions and Datadog API for application performance monitoring, Error Tracking and observability. - Conducted regular testing, debugging, and deployment to staging and production environments. - Collaborated with cross-functional teams using Slack for communication and Jira for task management and sprint tracking. - Followed agile development processes, participating in daily stand-ups, sprint planning, and code reviews.	
RCP (Rock Church Project) December 2023 - June 2024: - Contributed to an existing church management web application by implementing minor features and frontend enhancements using PHP, Laravel and Livewire. - Made UI improvements and bug fixes to support the existing system. - Collaborated on database operations with MySQL	
Full Stack Web Developer Makopa Inc, Parañaque City (Freelance - Remote)	September 2023 - December 2023
MakeltMemories (November - December 2023) Link: Developed an interactive online photo gallery that allows users to upload photos/videos, share moments, and create digital memories. Built with PHP, Laravel and MySQL. Salam Organization System (September 2023): Created a web platform for managing organizational activities, events, and member registrations for a non-profit organization. Built with PHP, Laravel and MySQL.
